Custom Processing

East Texas Beef Processors provides harvest and processing services for your domestic livestock needs. Our mission is to be a truly custom processor that strives to cut your product your way. Our cut sheet is designed so that we may better serve our customers by walking through each item cut by cut and providing the absolute best service available. In our experience customers do not enjoy seeing cuts in their freezer that they do not recognize or would not use as is. Therefore, we strive to make every cut of the animal into something useful and desired by the customer. After fabricating your animal to your specific cut from the cut sheet, your product is then vacuum packaged, labeled, and frozen without the addition of any preservatives or meat additives. We are a USDA inspected facility with an assigned inspector on site who inspects every animal thoroughly. Since we are USDA inspected you will be able to sell your product in the manner of your choosing.
